**Pos. I Position of rest (watch running)**  
**Pos. II During the blocking time from approx. 11.30 pm – 5.30 am, no day dates can be changed using the pusher, because during this time automatic changes are in progress. Pressing the pusher during these times may damage the movement.**  
**Setting sequence for: moonphase display, day of the week, day and time (e.g. after a battery change)**  
**1. Pull crown out to position II (watch is stopped).**  
**2. Set the moonphase display:**  
– Turn the hands forward by turning the crown, until the full moonphase position appears.  
**3. Set the day of the week and date:**  
– Turn the crown until the time of 06.00 am appears (= beyond the blocked time period).  
– Using the quick-change correction, set the date with pusher A, and the day of the week of the last full moon with pusher B (see table). Then using the crown, move the hands forwards until the current date appears.  
**4. Set the time:**  
– Turn the crown until the current time is displayed (remember the 24-hour cycle).  
**5. Push crown back into position I.**
